description:

* measurement range: 1.2~220 mm (steel)
* accuracy: + (1%H+0.1) mm
* resolution: 0.1mm
* velocity range: 1000~9999m/s
* working frequency: 5MHz
* pipe measurement lower limit: Phi 20*3mm (steel)
* automatic proofreading zero, on the system error correction
* linear automatic compensation, in the whole range of the probe using nonlinear error correction of computer software, in order to improve the accuracy of
* the data storage / data query / data delete function
* velocity measurement: according to directly measure the velocity of sample block thickness
* low power indication function
* automatic shutdown function
*LCD backlight function
* the warranty period: 12 months
* packing: color box +PP tool box
* Power: 3 1.5V AAA battery
