

MG10081-3

1

1. The instrument is used for measuring the refractive index of transparent materials.

2. The instrument is used for measuring the refractive index of transparent materials.

3. The instrument is used for measuring the refractive index of transparent materials.

4. The instrument is used for measuring the refractive index of transparent materials.

5. The instrument is used for measuring the refractive index of transparent materials.

6. The instrument is used for measuring the refractive index of transparent materials.

7. The instrument is used for measuring the refractive index of transparent materials.

8. The instrument is used for measuring the refractive index of transparent materials.

2

1. The instrument is used for measuring the refractive index of transparent materials.

2. The instrument is used for measuring the refractive index of transparent materials.

3. The instrument is used for measuring the refractive index of transparent materials.

4. The instrument is used for measuring the refractive index of transparent materials.

5. The instrument is used for measuring the refractive index of transparent materials.

6. The instrument is used for measuring the refractive index of transparent materials.

7. The instrument is used for measuring the refractive index of transparent materials.
