Key Features:

1．Adjustable Alarm Setting, notifies the user if the reading result is higher than the set temperature value

2．Memorize/records/recall the last 32 measurements

3．Measure body temperature regardless of room temperature

4．Selectable body temperature and surface temperature measurement

5．Precise non-contact measurement

6．Designed for intense & professional use

7．Selectable °C / °F

8．With auto range and resolution of 0.1°C (0.1°F)

9．LCD display with backlight

10．Undoubtedly durable and very reliable   Specifications:

Measuring Range:

Human Body/Forehead : 32.0°C~42.9°C (90°F~109°F)

Accuracy: ±0.3°C (0.54°F)

Measuring Distance: 5~8cm (2~3.2in)

Automatic Stop: 5sec.

Resolution: 0.1°C (0.1°F)

Response Time: 0.5sec

Operating Temperature: 10°C~40°C (50°F~140°F)

Storage data:Store 32pcs testing data

3 kinds of back light change according different temperature

Relative Humidity Rate: less than or equal to 85%

Power Supply : DC 3V(2 batteries AA)．used more than 10,000times,the life for using whole thermomter is more than 3,000,000times.
