

AR320 Digital Infrared Thermometer, Non-contact Digital Infrared Thermometer

Specifications:

- Measuring surface temperature in 1 second
- Wide temperature range from -32 to 320 °C (-26 ~ 608 °F)
- With D:S = 12:1, maximum distance from the target object
- Highly accurate and reliable
- 0.95 emissivity covering most of surface applications
- Spectral response from 8 to 14 μm
- Selectable scales between °C and °F
- Fast response time (0.5 seconds)
- Large clear LCD display with backlight
- Data hold function
- Pre-calibrated in factory
- Laser pointer ON/OFF
- Auto power off
- Low battery indication
