

## USB DM-200um

USB DM-200um is a high-resolution camera module designed for industrial and scientific applications. It features a 1/3" CMOS sensor with 2.00M pixels, providing sharp and clear images. The camera is compact and easy to integrate into various systems.

### Features

- 1/3" CMOS sensor
- 2.00M pixels
- High resolution
- Compact size
- Easy integration
- High frame rate
- Low power consumption
- Wide temperature range
- High reliability
- Low cost

### Specifications

DM-200um USB camera module  
CMOS sensor  
1/3" CMOS I/O  
2.00M pixels  
640H x 480V / 1280H x 960V / 1600H x 1200V  
Viewable area: 5x100x38mm / 200x2.5x1.9mm  
8 LED indicators  
10fps 1600x1200, 15fps 1280x960, 30fps 640x480 @

### Applications

- Industrial inspection
- Scientific research
- Quality control
- Process monitoring
- Security surveillance
- Medical diagnosis
- Environmental monitoring
- Research and development
- Education and training
- USB 2.0 / 1.1
- DC 5.0V
- 0.8W MAX
- 17" x 5" x 200"
- 0-300mm
- USB 2.0
- 36mm x 120mm
