

KL-169E ORP

ORP:

ORP (Oxidation-Reduction Potential) is a measure of the tendency of a chemical species to acquire electrons and thereby be reduced. ORP is measured in millivolts (mV).

IP55

Specifications:

- Range: -1999 to 1999mV
- Resolution: 1mV
- Accuracy: ±5mV
- Power: 4 × 1.5V AG13
- Temperature: 0°C to 50°C
- Dimensions: 188mm × 35mm × 35mm
- Weight: 118g
