

SM208 Manufacturer Direct Sale Digital Lux Light Meter ,Digital Illuminometer

Specification:

Measuring range: 0.01-39990cd/m²

Battery: 1pcs × 9V

Battery life: 100 hours

Measuring angle: <100°

Discription:

1. Adopting a detector powered by a silicone photocell with high stability, photostability, and shock resistance, strict vision correction and accurate photometric measurement can be realized.
2. With a wide measuring range, it can measure between 0.01-39990cd/m² without a dimmer.
3. It is a digital display with good indication reproducibility, data latching and peak value latching functions;
4. With very low power consumption, it can operate continuously for 100 hours on a 9V layer-built battery;
5. Mini light probe, measuring angle <100°;
6. Compact, portable, easy to use.
