

Inductive Moisture Meter MD918,wood / material moisture meter (non-penetration)

Inductive Moisture Meter, Moisture meter, Moisture tester. moisture content meter, moisture analyzer, moisture detectors

wood / material moisture meter (non-penetration)

Make inductive measurement of the moisture content of wood using the high-frequency electromagnetic waves. 10 grades of wood density available. It has the functions of setting the moisture upper limit and warning. Automatic compensation for environmental temperature.

wood / material moisture meter (non-penetration)

Measuring Range: 4%~80%

Resolution: 0.5%

Battery: 3x1.5V AAA alkaline battery

Dimension: 132Lx67Wx26H(mm)

Box size: 150mmx100mmx50mm

Net Weight: 180g/pcs

Gross Weight: 210 g/pcs

Accessories: Manual; Nylon case, Battery
