

## PH Meter PH-01

### Features :

This meter is a portable, accurate, and easy-to-use instrument for measuring the pH of various solutions. It is suitable for use in laboratories, schools, and industrial settings. The meter is designed to be simple and reliable, providing accurate readings for a wide range of pH values. It is also suitable for use in aquaculture, hydroponics, and other applications where pH measurement is important. The meter is easy to use and provides accurate readings for a wide range of pH values. It is also suitable for use in aquaculture, hydroponics, and other applications where pH measurement is important.

### Specifications :

1. Accuracy : 0.0 14.0pH
2. Resolution : 0.01PH  $\pm$
3. Range : 0.01PH
4. Temperature compensation : 0 ~ 60 °C
5. Resolution : 0.1PH
6. Range : 0 ~ 60 ° C
7. Features : through the meter

### Operation :

1. Remove the meter from the storage case.
2. First, turn the meter ON.
3. Turn the meter ON.
4. Immerse the pH electrode in the solution.
5. After the reading is stable, the meter will display the pH value. OFF the meter when not in use.
6. Always store the meter in the storage case.
