

Features:

Light-measuring levels ranging from 0.01lux~0.1klux/0.01fc~0.01kfc, repeatedly.

High accuracy and rapid response. Data-hold function for holding measuring values .

Unit and sign display for easy reading.

Automatic zeroing.

Meter corrected for spectral relative efficiency.

Correction factor need not be manually calculated for non-standard light sources.

Short rise and fall times.

Peak-hold function for tracing the peak signal of light pulse with least duration 10 μ s and keep it. Capable of selecting measuring mode in lux or fc scale alternatively.

Auto power off 30 minutes.

Maximum and minimum measurements.

Relative reading & Reset function.

Easy to read large backlit display
