

DTH-101 Food Thermometer/Meat Food Cooking Temperature Testing Thermometer

1.General descriptions

- 1.Wide range of applications
- 2.Food safe stainless steel sensor probe
- 3.Wide Temperature Range between -50 °C and 300 °C/58 °F to 572 °F
- 4.Switch between °C and °F
- 5.Automatic power off after 15 minutes without operation
- 6.Low battery indication
- 7.Sensor fault display
- 8.Memory of the previous measuring
- 9.Plastic tube casing included for storage and safety purposes

2.Specification

Description□

foldable thermometer kitchen thermometer

Dimensions

15.5*4.7*2 cm

Probe size□3.5x125mm

Temperature range:-50~300 °C/58~572 °F

Accuracy□+/-1% of full scale

Materials□304 stainless steel Probe, ABS Case

Unit packing□Sliding card
