

Ultrasonic thickness gauge GM100

- \* measurement range: 1.2~220 mm (steel)
- \* accuracy: + (1%H+0.1) mm
- \* resolution: 0.1mm
- \* velocity range: 1000~9999m/s
- \* working frequency: 5MHz
- \* pipe measurement lower limit:  $\Phi 20 \times 3$ mm (steel)
- \* automatic proofreading zero, on the system error correction
- \* linear automatic compensation, in the whole range of the probe using nonlinear error correction of computer software, in order to improve the accuracy of
- \* the data storage / data query / data delete function
- \* velocity measurement: according to directly measure the velocity of sample block thickness
- \* low power indication function
- \* automatic shutdown function
- \* LCD backlight function
- \* the warranty period: 12 months
- \* packing: color box + PP tool box
- \* Power: 3 1.5V AAA battery
- \* product net weight: 210 grams.
- \* the product size: 70\*145\*28 mm
