

Features:

Graphic Target ID Cursor (12 Segments)

Discrimination: Accept/Reject Notch

Electronic Pinpointing

Sensitivity, Depth Adjustment

Battery Condition Indicator

Coin Depth Indicator

Headphone Jack

Large Advanced LCD Display

Microprocessor Controlled

Push Button Controls

Clear Speaker Tone

Tone ID, 3 levels with Coin Alert

Touch-n-Go Operation

Search Modes:

All Metal

Jewelry

Custom

Relics

Coins

Specifications:

Length: 42"to 51"-Adjustable

Weight: 2.7 lbs.

Frequency-6.5kHz

4 AA battery operation (batteries not included for safety shipment reason)

2 year warranty

Settings:

Full Range, Multi Notch Discrimination Modes

Sensitivity/Depth

Mode, 5 Distinct Discrimination Patterns

Pinpoint

Searchcoil:

The MD-6250 comes with the Rhino Tough 6.5"×9"

PROformance interchangeable Searchcoil

Packaging Details

Package Weight:1.900kg (4.19lb.)

Package Size:56cm x 30cm x 17cm (22.05in x 11.81in x 6.69in)

Product Description

Power supply :4pcs 1.5V battery(not including)

Sensitivity :>25cm (for a US quarter)

operation modes : all metal,Zero,Jewelry,Coins

Coil :6.5 x 9 inch Proformance submersible searchcoil

Audio:Clear Speaker Tone

Detected indication :Large LCD screen

Battery Condition Indicator : yes

Distinguish :ferrous and non-ferrous

Warranty :1 year

1. Mode—Indicates which of the three detection modes is selected by highlighting the corresponding word on the LCD screen.
2. Target ID Legend—A printed Target ID Legend is located directly above the LCD screen and indicates commonly found targets and metals. When a target is detected, the Target ID cursor will appear below the word that most likely indicates the type of target found, based on its conductivity.
3. Upper Scale—The Upper Scale, where the Target ID cursor is illuminated when a target is detected, consists of five (5) graphical segments.

4. Target ID Cursor—The Target ID cursor is illuminated in the Upper Scale and indicates the probable identity of a detected target.
5. Lower Scale—The lower horizontal scale, or Notch Discrimination Scale, indicates the discrimination pattern where the detector will or will not produce an audible signal when a target is located. This scale changes when switching between Detection Modes.
6. Coin Depth—The depth of a coin, or similar sized target, will be shown on the LCD screen. Depth is indicated when the LCD scale is illuminated at “2”, “4” or 6+ inches.
7. Tone ID—The Tone ID feature produces distinct audible tones based on a target’s conductivity.

Payment Methods:

We accept TT bank wire transfer, Western Union, Paypal and escrow payment offered by Alipay Escrow and Escrow.com.

For latter three payment methods, extra charges shall be applied.

Shipping Methods:

To be shipped by express mail, by air or by sea based on customer’s request and weight/volume of goods.

Warranty:

We provide a limited quality warranty of 12 months for the items sold dating from their delivery date.
